I . RESOLUTION

AUGUSTA REGIONAL TRANSPORTATION STUDY

ENDORSEMENT OF ARTS

TRANSPORTATION IMPROVEMENT PROGRAM

WHEREAS, federal regulations for urban transportation planning require that the Metropolitan Planning Organization, in cooperation with participants in the planning process, develop and update the Transportation Improvement Program (TIP); and

WHEREAS, the Augusta-Richmond County Planning Commission has been designated by the Governor as the Metropolitan Planning Organization for the Augusta urbanized area; and

WHEREAS, the Transportation Improvement Program is consistent with all plans, goals, and objectives of the Augusta Regional Transportation Study, and shall be updated with revision to reflect changes in program emphasis and funding availability; and

WHEREAS, the urban transportation planning regulations require that the TIP be a product of a planning process certified as in conformance with all applicable requirements of law and regulation; and

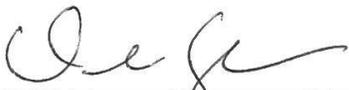

WHEREAS, the locally developed and adopted processes for private sector participation and public involvement have been followed in the development of the TIP; and

WHEREAS, the Augusta-Richmond County Planning Commission, the Georgia Department of Transportation, and the South Carolina Department of Transportation have reviewed the organization and activities of the planning process and found them to be in conformance with the requirements of law and regulation; and

NOW, THEREFORE, BE IT RESOLVED that the Augusta Regional Transportation Study Policy Committee endorses the attached three-year Transportation Improvement Program for the period FY 2010 - 2013 in Georgia and in South Carolina; and

BE IT FURTHER RESOLVED that the Augusta Regional Transportation Study Policy Committee finds that the requirements of applicable law and regulation regarding urban transportation planning have been met and its Chairman is authorized to execute a joint endorsement to this effect with the Georgia Department of Transportation and the South Carolina Department of Transportation.

October 22, 2009
Date

Deke Copenhaver, Chairman
Augusta Regional Transportation Study
Policy Committee

II. INTRODUCTION

a. OVERVIEW OF TRANSPORTATION IMPROVEMENT PROGRAM

The Augusta Regional Transportation Study (ARTS) was established in response to transportation planning requirements included in the Federal Aid Highway Act of 1962. This Act required urbanized areas with populations of 50,000 or more persons to have a cooperative, comprehensive, and continuing transportation planning process in order to qualify for Federal funding for highway projects. Subsequent transportation legislation has continued this requirement and expanded it somewhat to include all surface transportation projects. The most recent federal transportation law affecting ARTS is the Safe, Accountable, Flexible Transportation Equity Act: A Legacy for Users (SAFETEA-LU), enacted on August 10, 2005.

The Transportation Improvement Program (TIP) is a staged, multi-year intermodal program of transportation projects consistent with the Augusta Regional Transportation Study (ARTS) area long range transportation plan. The TIP is the link between planning for transportation needs and addressing those needs.

The ARTS TIP covers a four-year period for the Georgia portion of the study area and a five-year period for the South Carolina part. The TIP is updated each year with input from the general public, the ARTS committees and other stakeholders. The TIP is adopted by the ARTS Policy Committee and then approved by the governors of Georgia and South Carolina. Projects in the ARTS TIP are then included in the Georgia and South Carolina State TIPs.

The ARTS TIP includes all transportation projects, or identified phases of a project, proposed for financing with federal funds. Whether a project is scheduled to be completed in one year or phased over several years, it must advance to the TIP in order to be eligible for federal funding. The following information is included in the TIP for each project: description, estimated total cost, amount of federal funds allocated each program year, proposed sources of funding, and responsible implementing agencies. Funding for road and bridge projects is allocated for one or more of the three major phases of such projects: preliminary engineering, right-of-way acquisition and construction. A project is removed from the TIP once it advances to the construction phase.

The TIP must be financially constrained for each program year. The TIP financial plan must demonstrate that the identified projects can be implemented using current and expected revenue sources. The TIP also lists projects from the previous TIP that have moved to construction and identifies any significant delays in the implementation of projects remaining in the TIP.

When projects are added to the TIP, they are prioritized based on area-wide needs and safety and security benefits. Criteria used to establish area-wide needs include a project's inclusion in the ARTS Long Range Transportation Plan, its compatibility with other local and regional plans, the project's readiness and the availability of funds. In addition to area-wide needs, consideration is given to projects that demonstrate safety, and security benefits to one or more user groups (e.g. motorists, pedestrians, bicyclists, transit users and freight carriers). The need and purpose for the project must clearly identify the safety and security issues that will be corrected as a result of the project.

b. PUBLIC PARTICIPATION SCHEDULE – FY 2010 – 2013 TIP

DATE	ACTION
August 5, 2009	ARTS Test Network Subcommittee meeting to review projects and expected funding for the FY 2010 – 2013 TIP
August 27, 2009	Agendas sent out for September 3 rd special called meetings of ARTS Committees
September 3, 2009	Draft TIP recommended for approval by the Citizens Advisory Committee and the Technical Coordinating Committee
September 3, 2009	Draft TIP adopted by the Policy Committee
September 8, 2009	Begin thirty day public review and comment period on draft TIP.
September 8, 9 & 17, 2009	Published “TIP Public Review and Comment Period” notice in Aiken Standard, North Augusta Star, Augusta Chronicle, Augusta Focus; Metro Spirit; and Hola Augusta and on the Augusta-Richmond County Planning Commission website.
September 16, 17, 18, & 21, 2009	Published “TIP Public Information Meetings” notice in Aiken Standard, North Augusta Star, Augusta Chronicle, Augusta Focus; Spirit; and posted on the Augusta-Richmond County Planning Commission website.
November 25, 2009	Draft TIP sent to participating agencies / departments for posting for public review.
September 21, 2009	Public Information Meeting on the draft TIP held at the Aiken Co. Planning & Development Department in Aiken County.
September 22, 2009	Public Information Meeting on the draft TIP held at the Municipal Building in Augusta Richmond County.
September 24, 2009	Public Information Meeting on the TIP at the Columbia County Evans Government Complex in Columbia County.
October 8, 2009	End of 30-Day Comment Period for the Draft TIP
October 16, 2009	Agendas sent out for October 22 nd special called meetings of ARTS committees
October 22, 2009	Final TIP approved by the Citizens Advisory Committee and the Technical Coordinating Committee
December 30, 2009	FY 2010-2013 ARTS TIP printed and distributed to participating agencies and other stakeholders

**c. PUBLIC COMMENTS RECEIVED
ARTS FY 2010 - 2013
TRANSPORTATION IMPROVEMENT PROGRAM
PUBLIC INFORMATION MEETINGS**

AIKEN COUNTY PUBLIC MEETING – No one other than ARTS Staff attended

Comments received: None

RICHMOND COUNTY PUBLIC MEETING - Thirteen were in attendance plus ARTS staff

Comments received: Attendees said that more bicycle and pedestrian projects should be implemented and that the Augusta Public Transit system should be improved.

COLUMBIA COUNTY PUBLIC MEETING - One person attended plus ARTS staff

Comments received: Comments received were general questions about specific projects that are either in pre-construction or under construction.

**FINANCIAL PLAN
FOR
AUGUSTA PUBLIC TRANSIT PROGRAM OF PROJECTS**

PURPOSE

The purpose of this section is to address Augusta Public Transit's financial capacity to implement its four year program of projects listed in the Transportation Improvement Program (TIP). This is a requirement of FTA to insure that the local transit entity has the financial capacity to carry out the program for which federal assistance is being requested.

SCOPE

The FTA Circular provides that this assessment address two specific aspects of financial capacity. These are (1) the financial condition of APT and (2) the financial capacity of APT. This assessment includes the funding sources which support the APT system.

SYSTEM OVERVIEW

The City of Augusta purchased the Augusta Coach Company, a privately-owned company, in October of 1973 and began operating its routes and schedules. Later that same year, the City submitted an application to FTA to purchase twenty-one new buses. These new buses were used to replace the age old fleet of 1952 model buses that were purchased from the Augusta Coach Company. The 1974 model buses that were purchased to replace the 1952 models have also been replaced under the transit department's bus replacement program. Currently there are thirty five transit vehicles in APT's fleet. 100 percent of the total fleet is now handicapped accessible. Financial assistance from FTA, Georgia DOT and the City of Augusta was used to purchase these vehicles.

APT operates its routes from a transfer facility located at 1546 Broad Street, just west of downtown Augusta. Opened in 1991, the Transfer Facility includes a large indoor waiting area with benches, an information desk, restrooms, water fountains, soft drink vending machine, and a work area for APT staff. Covered breezeways flank either side of building, and eight sawtooth parking bays provide space for the loading and unloading of bus riders. There are also parking spaces for 20 vehicles.

APT's offices and maintenance garage are housed in a facility located at 1535 Fenwick Street, about four blocks from the Transfer Facility. There are six maintenance bays and a detached building for vehicle cleaning at the garage. APT administrative and operations staff is housed in a 5,000 square foot building erected in 1993 as part of a renovation project. The property includes parking spaces for buses, paratransit vans, and staff and visitor vehicles. During the spring of 2002, the vehicle parking area was expanded to accommodate the paratransit vehicles.

In January 1996 the City of Augusta and Richmond County consolidated to form one government and one entity. The urbanized area population is 335,630, and Augusta Public Transit serves approximately forty-one percent of this population.

FINANCIAL IMPACT OF THE 2010 TRANSPORTATION IMPROVEMENT PROGRAM

The proposed FY 2010 TIP reflects the purchase of the following items: Transit vehicles, preventive maintenance, ADA expenses, tire leasing, shop equipment, management training, capital maintenance items, interactive voice response (IVR), and contract contingencies.

FINANCIAL CONDITION

Augusta Public Transit is a department of the Augusta, Georgia consolidated government. The financial condition of Augusta Public Transit continues to be stable based on the consolidated government's continued commitment to provide financial support.

The non-federal share of the projected transit capital and operating projects listed in the TIP will be provided from revenues, the general funds of the consolidated government, and the Georgia Department of Transportation. A distribution of the projected FY 2010 non-federal sources of funding is as follows:

<u>Non-Federal Operating Funds</u>		
Entity		2010
State of Georgia	\$	
System Revenue	\$	750,000*
Local General Funds	\$	
TOTAL	\$	750,000

<u>Non-Federal Capital Funds</u>		
State of Georgia	\$	0
System Revenue	\$	0
Local General Funds	\$	617,400
TOTAL	\$	617,400

*Estimated revenue for 2010

FINANCIAL CAPACITY

Based on several key factors, Augusta Public Transit will continue to have the financial resources necessary to provide public transportation. These factors are dependent upon the continuing upward trend of revenues and the consolidated government's commitment to provide financial support for the provision of public transportation.

The Non-federal funding for the projects listed in the FY 2008-2011 Transportation Improvement Program will be provided by the consolidated government.

The total four year capital schedule is \$10,253,347. A State of Georgia match is not included because of State cutbacks. The total local funds needed to carry out the four year program is \$2,050,669.40. The remaining \$8,202,677.60 is anticipated funding from the Federal Transit Administration (FTA).

DOCUMENTATION OF PRIVATE SECTOR PARTICIPATION AUGUSTA PUBLIC TRANSIT

The Augusta, Georgia and the Augusta-Richmond County Planning Commission (MPO) developed a process to maximize participation by the private sector in the planning process. That process will be continued by the consolidated government. Several activities were carried out to encourage participation by the private sector.

- A. A description of the involvement of the private sector in the development of the specific projects: There is currently an individual from the private sector serving as a non-voting member on the Augusta Regional Transportation Study's Technical Coordinating Committee. It is during these committee meetings where all transit projects are reviewed and discussed. Representatives from the private sector are given the opportunity to provide their input concerning the various transit projects.
- B. A description of the proposals received from the private sector and how they were evaluated: Notices were published in the local newspapers and mailed to the private consultant firms for the development of a Transit Development Study. Bid information was mailed to ten consultant firms inviting them to submit proposals.
- C. A description of impediments to holding service out for competition and the measures taken to address the impact of such impediments: To date there are no known impediments to contracting out transit related services.
- D. A description and status of private sector complaints: No complaints have been received to date.

CAPITAL ITEM JUSTIFICATION**

<u>CAPITAL ITEM</u>	<u>JUSTIFICATION</u>
Transit Vehicles <35ft	This will be used to purchase 3 <35ft Orion buses to replace 3 1999 Bluebird buses that have reached their useful life.
Preventive Maintenance	This will be used for mechanics' salaries, mechanics' training and other mechanical related activities.
ADA Expenses	This will be used to cover ADA salaries, ADA training and other miscellaneous ADA expenses.
Management Training	This will be used to attend various transit conferences and meetings.
Tire Leasing	Tire leasing is being continued as a capital expense for FY 10 because it is less expensive than direct purchase.
Capital Maintenance Items	This project includes the rebuilding of engines, transmissions and other major capital items that may occur.
Shop Equipment	This will be ongoing expenses to replace miscellaneous shop equipment.
Interactive Voice Response (IVR)	This is a call back system for ADA clients to help with notification of scheduling.
Contract Contingencies	This will be ongoing expenses during the period to be applied to line items that may overrun.

c. BEST FRIEND'S EXPRESS

FY 2010-2013 Transportation Improvement Program For Aiken County Transit System Managed by Lower Savannah Council of Governments

Financial Plan

Purpose

The purpose of this section is to address the Aiken County Transit System's (Best Friend Express), managed by the Lower Savannah Council of Governments, financial capacity to implement its five-year program of projects listed in the Transportation Improvement Program (TIP). The Financial Plan is required by Federal transportation planning regulations as a means of demonstrating that the program of projects is financially constrained and that the local transit agency has the financial capacity to carry out the program for which Federal assistance is required.

Scope

Guidance from the Federal Transit Administration requires that this assessment address two specific aspects of financial capacity. These are: (1) the financial condition of Aiken County Transit System and (2) the financial capacity of Aiken County Transit System. This assessment includes the Federal Transit Administration Section 5307 (including ARRA funding) and 5303 funding and South Carolina State Mass Transit Funding, which support the operating, planning, and capital needs of Aiken County Transit System.

System Overview

The Aiken County Council established the Aiken County Transit System in 1990. Aiken County Council managed the system for many years and contracted the actual operations to the Aiken Area Council on Aging. During November 2004, Aiken County Council transferred the management responsibility for the system to the Lower Savannah Council of Governments. The system is still operated under contract between the Lower Savannah Council of Governments and the Aiken Area Council on Aging. The system currently provides fixed route and complementary paratransit service in and between the Cities of Aiken and North Augusta and through the Midland Valley area of Aiken County. The system no longer maintains a transfer point for urban passengers to transfer to a rural route and vice-versa. The rural transit service provider, Aiken Area Council on Aging is developing a system of rural routes, using Section 5311 funds from the SC Department of Transportation, which we hope can connect to the urban system. Because the need for a transfer point for passengers on various systems traveling into Aiken from outlying areas has been identified, it has become a goal to establish a suitable and safe transfer point once again to make it possible for passengers from outlying areas to access the Aiken County Transit system and, via that system, the Augusta Public Transit system.

The fixed route service, known as the Best Friend Express, began operating in October 1990. The complementary paratransit service, known as the Best Friend Dial-A-Ride, began providing service in February 1991. The Transit System's 47 square mile service area is estimated to have a population of 86,786 (2000 Census). The Transit System streamlined its routes in 2006 as plans were made to improve

the wait times and access points. The new routes and schedules are the first changes to the system since 1990 and are being favorably received by riders. There is now a transfer point between the Aiken and North Augusta system, currently at Aiken Technical College. The system also connects riders with the Augusta Public Transit System several times a day. There is one route that serves the south side of Aiken three times a day. Funding reductions in the FY 2010 local budget have necessitated a re-evaluation of the routes and the operation of the para-transit service and will likely result in changes during the year.

Financial Impact of the FY 2010-13 Transportation Improvement Program

The proposed Fiscal Year 2010-2013 TIP contains federal funds for both Section 5303 and 5307 planning and project administration and Section 5307, 5316, 5317, USDOT Mobility Services for All Americans grant and American Recovery and Reinvestment Act (ARRA) capital funding. State and local funds to cover operations and matching funds for these projects will be provided from allowable grants, contracts and other local funding sources. These projects will fund anticipated operating, planning, and capital needs of the Transit System in FY 2009-2010. Because during this time period there will be a substantial outlay for the purchase of capital equipment and a building expansion to help support the implementation of a national demonstration project that will include the Aiken County Transit System and residents of the urbanized area, expenditures are expected to peak during Fiscal Years 2009 and 2010, and to reduce in subsequent years to a maintenance level for the Travel Management and Coordination Center. It is hoped that expenditures for transit services and transit system enhancements and continuing capital needs in the Best Friend Express system will grow as the system improves and develops to meet area needs.

It should be noted that some of the above referenced funding amounts comes to the LSCOG on an annual fiscal year basis, and funds for the MSA Travel Management and Coordination Center project and ARRA capital funds will cross Fiscal Years 2009 and 2010.

Financial Condition

The Lower Savannah Council of Governments manages the Aiken County Transit System. The Lower Savannah Council of Governments, hereinafter referred to as "Council", was originally established in January 1968 and was officially reorganized under the authority of ACT 487 of the 1967 Acts of the South Carolina General Assembly as amended on June 4, 1971. The Council of Governments is a 501c(4) (public, non-profit) agency. As such, the Transit System is a program of Lower Savannah Council of Governments and operates within a budget approved annually by the Council's Board of Directors. Approval of the Transit System budget assures the commitment of Lower Savannah Council of Governments to provide the local funding necessary to meet the matching requirements of Federal and South Carolina funding programs.

The matching share of the projected operating, planning, and capital projects listed in the FY 2008-2011 TIP will come from allowable non-FTA grant funds, the South Carolina Department of Transportation, and local sources, which includes but is not limited to Aiken County Government, Aiken City Government, North Augusta City Government and Lower Savannah Council of Governments.

	<u>Non-Federal Operating Funds</u>
SC Department of Transportation	\$63,336
Local Sources	\$ 47,000

	<u>Non-Federal Planning Funds</u>
SC Department of Transportation	\$0
Local Sources	\$12,000

	<u>Non-Federal Capital Funds</u>
SC Department of Transportation	\$0
Local Sources	\$10,000

Financial Capacity

The Lower Savannah Council of Governments has the financial capacity to adequately fund the current operating, planning, and capital funding needs of the Aiken County Transit System. Within the reliability constraints of estimating the availability of funding over the five-year period covered by the TIP, it is expected that funding will continue to be adequate. In addition, since programmed use of FTA Section 5303 and Section 5307 (including ARRA funds), and SCDOT funding is within the amounts expected to be available, the TIP is financially constrained.

Section 5307 Funds

A portion of the FTA Section 5307 funds, including ARRA funds, apportioned to the Augusta-Aiken, GA-SC urbanized area are sub apportioned by the recipient, Augusta-Richmond County, GA, to Lower Savannah Council of Governments for use in funding the Aiken County Transit System. The sub-apportionment cannot be used for operating assistance.

South Carolina Department of Transportation Funding

The State of South Carolina provides local funds for operations to local transit systems through the State Mass Transit Fund Program (SMTF). The annual amount of funds from SCDOT is approximately \$60,000.00.

Local Funds

The amount of local funds available for funding operating, planning, and capital assistance projects is determined year-to-year in the Lower Savannah's budgetary process. The amount of local funding included in the FY 2009-10 portion of this Financial Plan is consistent with available local funding. For the purpose of this Financial Plan, it was assumed that at least enough local funding would continue to be approved each year to meet the matching requirements of Federal and State programs.

FY 2010-2013

Transportation Improvement Program for Aiken County Public Transit System

Description of Projects

The Transportation Improvement Program for the Aiken County Public Transit System includes operating, planning, and capital projects that are partially funded with Federal Transit Administration Section 5303, 5307(including ARRA funds), 5316, 5317 and Mobility Services for All Americans funds provided directly to the LSCOG from the US DOT. The projects are described below:

Projects

The TIP includes all annual projects, however, no operating funds are available through FTA Section **5303 / 5307 programs**. Section 5307 capital funds may be used to help provide mobility management services to members of the public, and the Council will incorporate mobility management services into its services offered during the current and future fiscal years. Plans also call for the purchase of additional vehicles to enhance the capacity of the system. **ARRA funds under Section 5307** will be used to purchase two replacement fixed route vehicles and to expand and enhance the Travel Management and Coordination Center, which will also host a transfer point to passengers from outlying areas who wish to access the Best Friend Express and Augusta Public Transit systems, via the Best Friend Express. The following section will list other projects Lower Savannah may pursue over the specified time period.

5316 - Job Access and Reverse Commute

Lower Savannah COG will utilize this program to provide Mobility Management services to the public, enhance both the Travel Management and Coordination Center and the transit system and provide more opportunities for local citizens. The 80% match for capital projects, including technology equipment and Mobility Management Services and the 50% match for operation of transit services will be provided through local contracts Medicaid, Workforce Development and other resources.

5317 – New Freedom

This project will be used to enhance and expand the ADA Demand Response component of the Best Friend Express and mobility management services to people with disabilities through the Travel Management and Coordination Center and to enhance transportation opportunities, services and resources. This project will require a 20% match for capital projects, including technology equipment and mobility management services, and a 50% match for operation of services, which will be provided by grant and other contracts and revenues and local funds.

US DOT United We Ride/Mobility Services for All Americans Initiative Funds

Lower Savannah COG is one of three national recipients of funding under this initiative, through the Office of Joint Programs in US DOT. The grant is for implementation of a design developed during an earlier technology planning grant from the US DOT, that will provide a Travel Management and Coordination Center project located in Aiken. This center will utilize ITS technology to help transit services to operate more efficiently and to provide better customer service. Mobility Management services will be provided from the center to local citizens to learn about transit resources, to access transit and to address problems and issues with transit service. Travel training and coordination services will be a part of the Mobility

Management services provided in the center. A federal grant of \$680,000, matched with \$170,000 in non-FTA funding from the Centers for Medicare and Medicaid Services will help in the implementation of this project. Additional funding from other FTA sources will contribute to the implementation of the project, also, as evidenced in earlier sections of this plan.

Capital Cost of Contracting

Capital Cost of Contracting is provided through this project in accordance with FTA Circulars. Any maintenance not covered by Capital Cost of Contracting provisions is included as other maintenance costs.

Transit Buses

Two additional fixed route vehicle and two paratransit vehicles are slated to be replaced, using Section 5307 (including ARRA) funds. The system currently owns no vehicles to be used in paratransit, and capacity of the contracted provider has begun to present a problem. The Council is considering the exploration of deviated fixed routes to better serve passengers with disabilities, and, in either the current or proposed scenarios, the system would benefit from these vehicle purchases.

Project Administration

In accordance with SAFETEA-LU a portion of the cost to manage transit contracts may be charged to capital funding.

Non-fixed route ADA paratransit service

In accordance with SAFETEA-LU 20% of paratransit service cost may be charged to capital funding.

Facility Expansion and Improvements

Using ARRA funds directed to the Aiken urbanized area, the Council plans to expand its facilities to provide space to accommodate the Travel Management and Coordination Center and to serve as a transfer point for travelers from outlying areas to access the Best Friend Express and, if desired, the Augusta Public Transit System. There is currently not a transfer point which provides safety or any amenities for passengers, and the need for such a facility is growing, as ridership increases. ARRA funds to provide these improvements will be used in conjunction with grants from the Centers for Medicare and Medicaid Services, through the Office of the Lt. Governor of SC; Sections 5316 and 5317 funds through SCDOT and a United We Ride/Mobility Services for All Americans Implementation grant through the USDOT.

Enhancements

Transit Enhancement Funds will be dedicated to amenities that enhance current services.

TMCC

Mobility Management activities and the use of Intelligent Transportation System technologies to enhance and improve service operations, management and to increase customer access to mobility and self-sufficiency will be offered through this center, to be located in Aiken.

Planning Projects

The TIP includes work elements that are designed to address the eight Planning Focus Areas included in the Safe, Accountable, Flexible Transportation Equity Act: A Legacy for Users (SAFETEA-LU) enacted on August 10, 2005. Section 5307 and 5303 planing funds will be used in this endeavor. The eight Planning Focus Area applicable to each work element are listed below.

- Support the economic vitality of the Aiken County area;
- Increase the safety of the transportation system for motorized and non-motorized users;
- Increase the security of the transportation system for motorized and non-motorized users;
- Increase the accessibility and mobility to the citizens of the area;
- Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and state and local planned growth and economic development patterns;
- Enhance the integration and connectivity of the transportation system, across and between modes, for local citizens;
- Promote efficient system management and operation; and
- Emphasize the preservation of the existing Aiken County Transportation system.

The TIP includes annual projects, which address anticipated transit-planning needs of the Transit System. The planning project funding included for FY 2009-10 will be used to fund the Transit System's seven work elements in the FY 2009-10 Unified Planning Work Program for the Augusta Regional Transportation Study (ARTS). These work elements are:

- 4.2.3 Administration Public Transportation Program-South Carolina (SC)
- 4.2.5 Transit Project Administration-SC
- 4.2.6 Update of Complementary Para-transit Plan
- 4.2.7 Marketing and Public Information-SC
- 4.2.8 Short-Range Transit Planning
- 4.2.9 Long-Range Transit Planning
- 4.2.10 Transit Financial Planning-SC

a. CARRYOVER AND LUMP SUMS

Where Carryover Funds come from:

Carryover funding describes two types of federal funds not obligated in the year appropriated. The first type of these funds results when a State is unable to fully access the annual distribution of funds due to a congressional budgetary restriction call of “obligation authority”. Obligation authority restricts a state from spending total appropriated funds. Unobligated balances of appropriated funds may be utilized to fund projects in the following ways:

1. A State may choose to advance fund the construction authorization of a federal-aid project by temporarily funding the federal share with nonfederal funds. Multi-year Transportation Acts allow states to advance construct up to the contract authority provided in the Act. Advance construction is a method of “Pre-financing” the federal share of project costs. These costs are later converted to regular federal highway funds as Congress provides new appropriation and/or obligation authority.
2. A State can use carryover funds when obligation authority is redistributed from other states. Near the end of each federal fiscal year, the Federal Highway Administration redistributes obligation authority from states that return unused spending authority.
3. A State can use unobligated balances to fund a project if Congress appropriates additional obligation authority.

The second type of carryover funds results when a State does not fully obligate special federal-aid funding categories such as minimum guarantee, highway demonstration projects, and high priority projects. For these types of funding categories, Appropriations Acts provide obligation authority for each appropriated dollar.

How Carryover Funds are used:

The following describes how the STIP Financial Plan (SFP) is developed. The SFP is the spending plan for allocating transportation funding to state and local projects. It addresses a time period of four years, and, by law, is financially constrained by forecasted funding levels. Forecasted funding levels are based on the historical spending authority provided to the State in the last available year. These levels are adjusted to funding estimates provided in the current multi-year transportation bill. Added to the adjusted funding ceiling are the previously appropriated / allocated Federal funds (carryover) that are unexpended and available. Both types of carryover funds are assigned to projects. However, type 2 carryover funds are not used until all the current year obligation authority has been utilized. If the advanced construction method is used, type 1 carryover funds, a conversion project is set up in the STIP for the year that federal funds are going to be used to reimburse project costs.

How Carryover Funds are shown for fiscal constraint:

The Transportation Equity Act for the 21st Century (TEA-21) requires that the State Transportation Improvement Program (STIP) "...include a project, or an identified phase of a project, only if full funding can reasonably be anticipated to be available". Since both types of carryover funds can be used to fund projects in a year different than the year funds were received, they are considered reasonably available and are added to the annual estimated appropriated funds for the period covered by the STIP.

The STIP financial plan fully documents the amount of carryover funds by year and category of funding, as well as, estimates of future revenues.

Lump Sum Funding

A portion of the STIP funding is set aside for seven groups of projects that do not affect the capacity of the roadway. Funds are set up in lump sum categories to undertake projects that are developed after the STIP is approved. These lump sums are listed in a number of funding types for each year for the Department's convenience in managing and accounting for the funding. Funds are drawn from these lump sums during the year and individual projects are programmed. The individual projects may include work at one or several locations for letting and accounting purposes. Listed below are these seven groups and information about them. Except for groups for preliminary engineering and rights of way protective buying, the total available funds are shown as construction for easy accounting, but preliminary engineering and rights-of-way may be drawn from this amount when needed in that category.

Group: maintenance

Criteria: maintenance only

This group has six funding/work types: two are for bridge painting/maintenance and the other four are for roadway maintenance. Major types of work undertaken are: resurfacing, pavement rehabilitation, median work, impact attenuators, signing, fencing, pavement markings, landscaping, rest areas, walls, guardrail and shoulder work. Also included is preliminary engineering necessary to prepare plans and rights-of-way needed for work such as landslide repair, sewer hookups and erosion control.

Group: safety

Criteria: work qualifying for the High Hazard Safety Program

This group has four funding/work types: signal installation/upgrades, guardrail installation, sign installation, railroad protection devices, railroad crossing hazard elimination, roadway hazard elimination and special safety studies and programs.

Group: preliminary engineering

Criteria: planning, management systems and consultant design services

This group has two funding/work types: planning/management systems and consultant design services

Group: wetland mitigation

Criteria: site restoration for projects already under construction/complete and wetland banks

This group is a single item.

Group: roadway/interchange lighting

Criteria: lighting

This group is a single item.

Group: rights of way - protective buying and hardship acquisitions

Criteria: purchase of parcel(s) of rights of way (RW) for future projects that are in jeopardy of development and for hardship acquisition. Qualifying projects are those that have preliminary engineering (PE) underway or have a PE, RW or construction phase in the STIP. For counties that are not in conformance for air quality the only qualifying projects are those that have a RW phase in the STIP.

This group is a single item.

Group: transportation enhancement

Criteria: projects qualifying for the Transportation Enhancement program (TEA).

TEA projects shown in the STIP will be funded on a first come, first served basis. When a project is funded it is drawn down from the lump sum. When all funds are exhausted, no other projects can be funded until the next fiscal year, which begins on July 1.

This group is a single item.
